## Profile

I am a programmer and designer living in Los Angeles. I graduated from UCLA's art/code hybrid Design Media Arts program in 2017, and have since been working in the field of web development and software engineering. Please visit my website at [justinp.io](http://justinp.io) for details, code snippets, and documentation on my personal projects.

## Education

**University of California, Los Angeles — BA, Design | Media Arts, 2017**

## Technologies / Languages

Ruby (& Rails), HTML/CSS, SQL, Git, Linux/Unix, HTC Vive, Photoshop, Illustrator, InDesign, Unity & C#,

## Work History

### AppliedVR: Full Stack Developer — 2019-2020

Contributed to the development of healthcare startup AppliedVR's platform framework by creating backend and full-stack solutions to support various business needs such as VR Content Configuration & Distribution, Inventory & Order Management, Device Management, and Quality Assurance. Led development and execution of an automated configuration and build process, which was adopted to service hundreds of production devices.

### Freelance Web Developer — 2018-2019

Partnered with multiple clients such as a prominent composer, financial wellness firm, and apparel company to realize their website visions from the ground up. Used various modern web technologies such as Ruby on Rails and AWS services. Each client's vision was designed, developed, and deployed according to their unique requirements and personalities.

### iD Tech Camps: Assistant Director — 2013-2017

As an Assistant Director, I led daily operations of one of our largest sites, directly managing and leading a 25-person staff, and facilitating instruction and safety for 160 students each week. We taught over 1,000 students each summer in disciplines ranging from Programming in Java and C++, to game design and development, to web design and photography.
